Bee Bald LLC

Dennis Fisher

"Making all men look great, one head at a time!"

After realizing the market was lacking in premium men's grooming products that were both affordable and made with quality ingredients, CEO Dennis Fisher, set out to create a line of his own. Since 2012, Bee Bald manufactures and distributes men's grooming, shave and skin care products selling to U.S. retailers as well as to consumers online, everywhere. Each product is made with honey and pollen extracts, which can be used on both the face and head. More importantly, you don't have to be bald to use them!

"I've known and worked with the Ashers for many years, first, as a partner in commercial real estate projects in the southeastern part of the U.S. and more recently, as their tenant on Miles Road. Lease negotiations with Rob Namy were seamless and we're thrilled with both the space and the relationship. Pretty soon it will be time to expand!"
